The CDC added more data yesterday into the Vaccine Adverse Event Reporting System (VAERS), a U.S. Government funded database that tracks injuries and deaths caused by vaccines.

The data goes through February 26, 2021, with 25,212 recorded adverse events, including 1,265 deaths following injections of the experimental COVID mRNA shots by Pfizer and Moderna.

From the 2/26/2021 release of VAERS data:

Found 25,212 cases where Vaccine is COVID19

Table

 Event Outcome	 Count	 Percent
Death	1,265	5.02%
Permanent Disability	479	1.9%
Office Visit	3,888	15.42%
Emergency Room	22	0.09%
Emergency Doctor/Room	4,908	19.47%
Hospitalized	2,742	10.88%
Hospitalized, Prolonged	1	0%
Recovered	9,236	36.63%
Birth Defect	36	0.14%
Life Threatening	886	3.51%
Not Serious	8,946	35.48%
TOTAL	† 32,409	† 128.55%

† Because some cases have multiple vaccinations and symptoms, a single case can account for multiple entries in this table. This is the reason why the Total Count is greater than 25212 (the number of cases found), and the Total Percentage is greater than 100.

Besides the recorded 1,265 deaths, there were 4,930 visits to Emergency Room doctors, 479 permanent disabilities, and 2,743 hospitalizations.

The CDC also updated their *Selected Adverse Events Reported after COVID-19 Vaccination* page on March 1st this past week, and according to this report, VAERS has received 1,381 reports of death.

For some reason, the CDC does not immediately release this data to the VAERS system, sometimes publishing it weeks later.

Historically, less than 1% of all vaccine injuries and deaths are ever reported to VAERS:

Although 25% of ambulatory patients experience an adverse drug event, less than 0.3% of all adverse drug events and 1-13% of serious events are reported to the Food and Drug Administration (FDA).

Likewise, fewer than 1% of vaccine adverse events are reported. Low reporting rates preclude or slow the identification of “problem” drugs and vaccines that endanger public health. New surveillance methods for drug and vaccine adverse effects are needed. (Source.)

So we really have no idea what the true numbers are, since the CDC controls all the data, and the CDC has proven many times that they are corrupt and not reliable, since they own over 56 patents on vaccines, and many of their scientists earn royalties from the sale of vaccines. (Source.)

Can We Trust the CDC? British Medical Journal Reveals CDC Lies About Ties to Big Pharma

CDC Scientist Whistleblowers Confirm Corruption Within the CDC

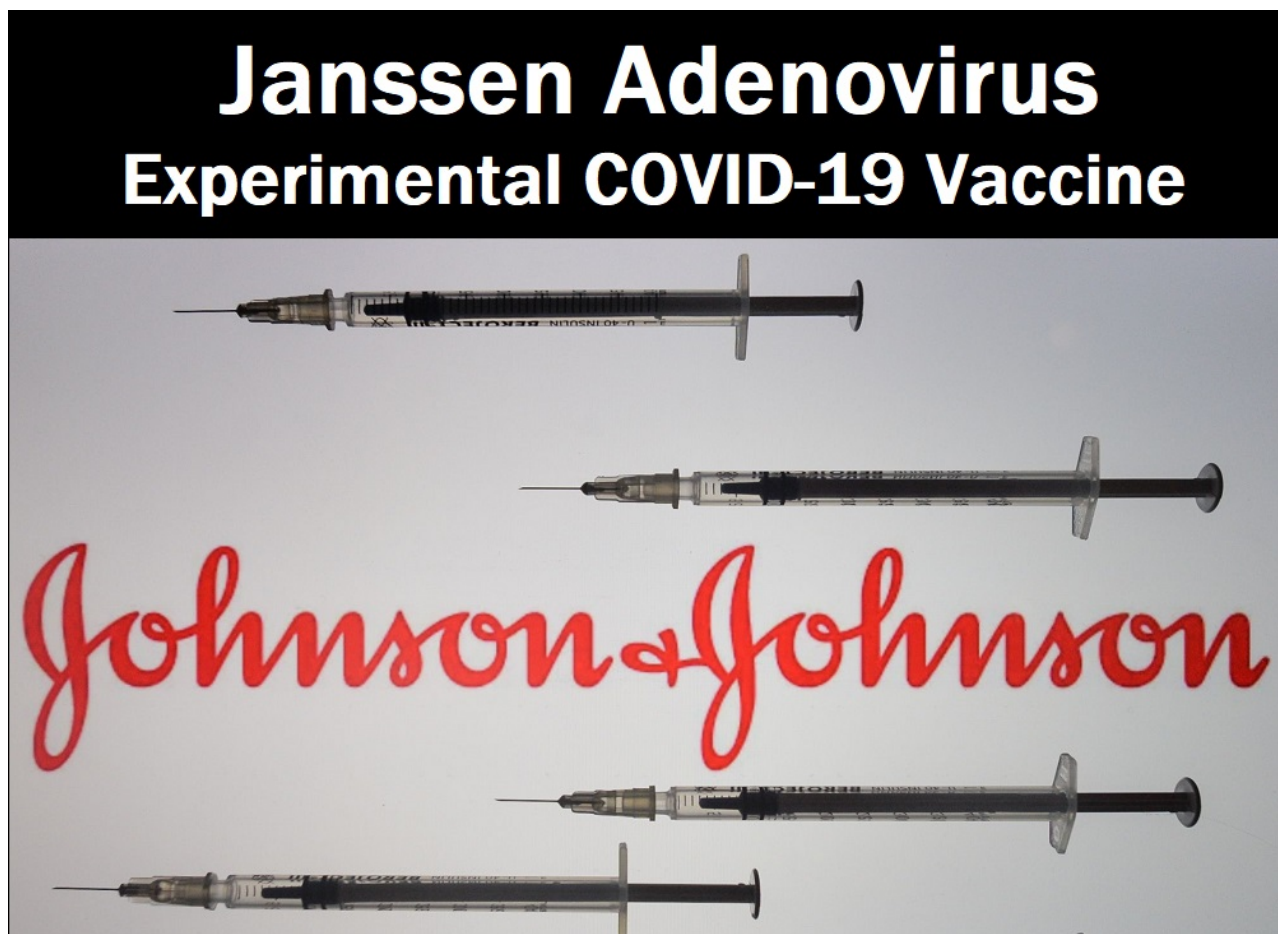

Should the CDC Oversee Vaccine Safety When They Purchase Over \$5 Billion of Vaccines from Big Pharma?

But there is one thing that the CDC wants to assure the public with: these tens of thousands of injuries and hundreds of deaths that are occurring following the COVID mRNA injections have nothing to do with the vaccines. Not one of these deaths is related to the vaccine.

CDC and FDA physicians review each case report of death as soon as notified and CDC requests medical records to further assess reports. **A review of available clinical information including death certificates, autopsy, and medical records revealed no evidence that vaccination contributed to patient deaths.** ([Source.](#))

We also reported earlier this week that the VAERS system is reporting numerous miscarriages and pregnancy complications following the experimental COVID vaccines, and one whistleblower nurse claims that these injuries and fetal deaths are being hid from the public. See:

Whistleblower Reveals Many Pregnancy Complications following Experimental COVID Injections – “Vaccine Leaving a Trail of Devastated Mothers”

Third Experimental COVID Vaccine Now Issued Emergency Use Authorization – Existing Cures Ignored or Banned

Besides the two experimental mRNA COVID “vaccines” now being used on the American public to complete their Phase III drug trials in an effort to get full FDA approval, a third experimental COVID vaccine by Johnson and Johnson was also just given emergency use authorization (EUA) to test on the American public. See:

FDA Issues Emergency Use Authorization for Another Experimental COVID-19 Vaccine

All of these EUAs are illegal, as safe and effective treatments for COVID-19 are readily available, including hydroxychloroquine and ivermectin, and also high-dose Vitamin C administered via IV fluids.

One family in New York had to go all the way to the New York Supreme Court to allow them to save their mother’s life by giving her ivermectin, which the hospital refused to do, and would have rather stood back and watched her die. See:

New York Supreme Court Judge Saves 80-Year-Old Patient from Death by Ordering Hospital to Give Life-Saving Ivermectin

Big Pharma cannot admit that these older drugs, already approved by the FDA, but where the patents have expired and therefore cannot qualify for the \$TRILLIONS of government money being spent on novel new drugs and vaccines, are effective against COVID, because it would be basically admitting that they are criminals who do not care about cures for peoples’ health, but only in profitable new drugs.

But thousands of ethical doctors around the world are using these older drugs successfully, and some have even published their protocols online. See:

Frontline Doctors Publish their Early Treatment Protocol for COVID that is Saving Many Lives – Vaccines Not Needed

Dr. Meryl Nass, MD, has published a resource guide to find these drugs if your own doctor is unwilling to prescribe it. See:

How you can receive early effective treatment for Covid
