## COVID INJECTION WARNING

A week ago my mum was airlifted to Fiona Stanley Hospital in Perth. It started of as a spot on her tongue that got bigger overnight. It progressed very quickly to the inside of her gums bleeding & everywhere she touched on her body came out in a huge dark bruise straight away. If she rubbed it it bled out. These pics were taken within the first 2 days & progressively got worse all over her body. Her body had killed off all her white blood platelets so she had a count of 0 compared to the 100 she should have. So far she has had 2 transfusions which has brought her count back up to 2. Still such a long way to go. Mum has had a whole body CT Scan & doctors have ruled out 100% that she does not have cancer at all thank god, but they are now saying it is related to the Astra Zeneca COVID Injection. She is now facing a possible operation to remove her spleen as that is what is attacking her body. Mum is probably going to be in care for a while yet but I'm so thankful that we still have her with us. Please don't let your parents have this shot. There is not enough known about it & there is no way that I'm having it. My mind was made up right from the start. This nearly killed my mum & I'm so thankful that she's in the best place possible to hopefully recover eventually back to her normal self. Love you Mum & see you on Wednesday ❤️ ❤️ ❤️

Wishing your mum a speedy recovery

Trudy Love

and I'm with you there I won't get the vaccine either.

UPDATE....Mum has to have a bone marrow biopsy tomorrow morning to determine what course of action the doctors will take next. She still has only 2 white platelets but at least her body has not attacked them so that's a bonus. Still a long way to go as...
