September 16, 2022

Hundreds of doctors from across 34 countries have declared a medical crisis due to what they allege is excess disease and deaths related to the COVID vaccine.

Hundreds of doctors declare medical crisis from vaccine.

“We, the medical doctors and scientists from all over the world, declare that there is an international medical crisis due to the diseases and deaths co-related to the administration of products known as “COVID-19 vaccines,” their statement begins.

“We are currently witnessing an excess in mortality in those countries where the majority of the population has received the so called “COVID-19 vaccines”. To date, this excess mortality has neither been sufficiently investigated nor studied by national and international health institutions.”

DECLARATION OF INTERNATIONAL MEDICAL CRISIS

« we consider that we are facing a serious international medical crisis, which must be accepted and treated as critical by all states, health institutions and medical personnel worldwide » — <https://t.co/FLKPrBKGt> pic.twitter.com/6ywpw0VFRT

 Over 400 doctors, scientists and professionals from more than 34 countries have declared an international medical crisis due to “diseases and death” associated with the COVID-19 vaccines...

— Ben Swann (@BenSwann_) [September 13, 2022](#)

The declaration announced on September 10 originated from doctors in India. Some of the signers are fake, causing critics to disparage the entire statement.

However, panellists at the press conference were medical professionals.

Doctors claim a proper investigation is needed into what they allege is an abnormally high number of miscarriages and perinatal deaths.

Birth data from many countries appear lower than average compared to previous years. In July, a Hungarian government official sounded alarm bells over the lowered birth rate.

Hungary's government officials concern that the birth rate has dropped by 20% since the v rollout.

“In January this year, something happened that has not happened for decades,” said MP Dúró Dóra, speaking to Parliament.

“The birth rate fell by 20% compared to the same period last year. And what is even more worrying is that the fertility has also fallen — something not seen since 2011.”

“A researcher at the KRTK Institute of Economics points out that this drastic decline came just nine months after the COVID mass vaccinations began in Hungary.”

The declaration lists ten measures that should be taken immediately, including “A worldwide stop” to the national inoculation campaigns with products known as “COVID-19 vaccines,” as well as an investigation into sudden deaths.

“Examining the reports on CDC’s VAERS, the UK’s Yellow Card System, the Australian Adverse Event Monitoring System, Europe’s EudraVigilance System and the WHO’s VigiAccess Database, to date there have been more than 11 million reports of adverse effects and more than 70,000 deaths co-related to the inoculation of the products known as ‘covid vaccines.’”

“We know that these numbers just about represent between 1% and 10% of all real events.”

In July, CTV reported on an “unprecedented increase in ill-defined and unknown causes of death” in Alberta from 2021. The province had 3,362 unknown cause deaths in 2021, compared to 1,464 in 2020, and 522 in 2019.

This 2021 figure was higher than the province’s total amount of dementia and COVID deaths, respectively.
